Chrysan® SYN 668

Plymouth, MI – June 1st, 2021. Chrysan® SYN 668, is a new synthetic Automatic Transmission Fluid that meets Allison Transmission, TES 668™. Find out more about Chrysan® SYN 668 at www.chrysanindustries.com.

Chrysan® SYN 668 is the next generation specification fluid for on-highway vehicles, is specified for all of Allison’s 1000, 2000, 3000, and 4000 Series™ automatic transmissions, and is backward compatible for every Allison transmission that requires an approved TES 295® fluid. Chrysan® SYN 668 built upon the proven 20 year record of TES 295® fluids by delivering the same great performance with a modernized additive package.

Chrysan® SYN 668 has many advantages compared to mineral-based, non-synthetic fluids. It demonstrates performance in a number of key areas, such as oxidative stability, anti-wear performance, and friction modifier durability. These contributing factors improve the quality of shifting and provide reductions in noise, vibration, and harshness. Improved friction performance provides consistent clutch application across temperature variations and load sizes.

Chrysan® SYN 668

Features + Benefits	Chrysan® SYN 668	Mineral-Based Fluids
Compatibility	√	√
Durability	√	√
Lower Operating Expenses	√	√
Backed By An Allison Factory Warranty	√	√
Supported By Allison Global Service Network	√	√
Better Shift Quality	√	
Improved Friction Performance	√	
Improved Anti-Wear Performance	√	
Longer Lasting Anti-Shudder Agent	√	
Cold Performance	√	
Extended Drain Intervals	√	
Enhanced Transmission Performance	√	
Offers Optimum Transmission Protection	√

- Chrysan® SYN 668 fluids can be mixed with TES 295® and TES 389® fluids.
- Chrysan® SYN 668 fluids have the same oil change/drain intervals as TES 295® fluids.
- Chrysan® SYN 668 fluids have the same prognostic settings as TES 295® fluids.
- Chrysan® SYN 668 fluids have the same oil temperature operating range as TES 295® fluids.
- Chrysan® SYN 668 fluids will not affect the transmission oil cooling, oil levels, calibrations, or any other aspects of the transmission installation.

As the [Allison Authorized partner](#), Chrysan offers the Chrysan® SYN 668 in three packaging sizes - Tote, Drum and Pail - directly to our customers.

Find out more about Chrysan® SYN 668 by contacting us at (734) 451-5411 or email us at info@chrysanindustries.com.

Founded in 1977, Chrysan is a global manufacturer of lubricants & specialty chemicals. Chrysan's portfolio includes automotive & industrial lubricants, aerospace lubricants, greases, and other specialty chemicals. Headquartered in Plymouth, Michigan, Chrysan has facilities throughout Mexico, China, and South Korea.
